PROFESSIONAL SUMMARY

Frontend Engineer, immediately available, with 6+ years of experience building production-grade web applications using **React.js, Next.js, and TypeScript**. Experienced in developing scalable features across diverse domains - **E-commerce platforms, admin dashboards, and enterprise applications**, including product flows, order management systems, and internal tools. **Strong in REST API integration, performance optimization, and modern frontend architecture (SSR, CSR, ISR)**. Proven ability to collaborate with cross-functional teams, take **ownership** of **end-to-end frontend modules**, and deliver high-quality user experiences in production environments.

CORE SKILLS

* **Languages:** JavaScript (ES6+), TypeScript
* **Frontend:** React.js, Next.js (Pages Router & App Router), HTML5, CSS3, Tailwind CSS, Shadcn/ui, Material UI, AG Grid, Bootstrap, Webpack, Vite
* **State Management:** Redux Toolkit, Context API, Zustand
* **Forms & Validation:** React Hook Form, Zod
* **Web Concepts:** Component architecture, SSR, CSR, ISR, Responsive Design, and Browser DevTools / Debugging
* **API Integration:** REST APIs, Axios, Fetch, JWT Authentication
* **Backend – Basic Exposure:** Node.js, Express.js, MongoDB, Mongoose
* **Performance:** Render Optimization, Code-Splitting, Lazy Loading, Web Vitals, Lighthouse, Browser Performance / Profiling
* **Testing:** Jest, React Testing Library
* **Web Standards & Security:** Semantic HTML, Accessibility (WCAG), Cross-Browser Compatibility, Security Best Practices
* **Tools:** Git (Branching, PRs), Figma, Jira, Postman, Redmine, VS Code, CI/CD, ESLint, Prettier, Husky
* **Methodology:** Agile, Scrum, Sprint Planning
* **Others:** Code Reviews, Mentoring Junior Developers, Reusable UI Components

PROFESSIONAL EXPERIENCE

Poorvika Mobiles Pvt Ltd

Software Engineer
January 2020 – April 2026

Product-based retail organization operating **450+ offline stores across India**, along with an in-house **E-commerce platform**. The organization builds and maintains multiple **business-critical internal web applications** used daily by **store operations, support teams, and corporate users** to manage orders, customer data, and operational workflows

Order Management System (Admin Dashboard) | 2023 - 2026

Role: Frontend Engineer
Tech Stack: Next.js, TypeScript, Redux Toolkit, REST APIs, Axios, Tailwind CSS, Shadcn/ui

- Owned the frontend development of a large-scale **Order Management System** used by operations and support teams to manage orders, customers, inventory, and order lifecycles.
- Designed and developed **scalable admin dashboards** with complex data tables, advanced filters, pagination, and role-based access control.
- Built **15+** custom UI components by extending **Shadcn/ui** and **Tailwind CSS**, streamlining the development workflow and reducing feature delivery time by **30%**.
- Developed complex data tables with advanced sorting, filtering, and pagination powered by **TanStack Table** to support high-volume operational workflows across **450+** retail store locations.
- Integrated multiple REST APIs and ensured efficient data rendering and state synchronization.
- Collaborated closely with backend and QA teams to deliver stable, production-ready features.
- Actively handled UI enhancements, bug fixes, and performance improvements in a live production environment.

E-Commerce Platform | 2022 - 2023

Role: Frontend Engineer (Module Contribution)
Tech Stack: Next.js, TypeScript, Zustand, Tailwind CSS, REST APIs, Axios

- Optimized customer-facing E-commerce workflows—including product listing pages and checkout UI—contributing to a **15%** improvement in frontend page loading speeds.
- Refactored Cart functionality and Payment option selection UI, which reduced client-side checkout errors by **20%**.
- Collaborated with senior engineers to understand **end-to-end E-commerce flows** from product discovery to order placement.
- Implemented UI enhancements and minor feature updates while following established architectural and coding standards.
- Gained hands-on exposure to **Next.js routing, Data fetching patterns, and Production-grade E-commerce workflows**.

Ticketing System (Internal Application) | 2021 - 2022

Role: Frontend Engineer / Module Lead
Tech Stack: React.js, TypeScript, Context API, Axios, REST APIs, Tailwind CSS,Material UI

- Lead the frontend development of an internal **Employee Ticketing System** used for issue tracking, approvals, and resolution workflows.
- Designed and implemented the complete ticket lifecycle: **Creation** → **Assignment** → **Approval** → **Resolution** → **Acknowledgment**.
- Acted as Module Lead managing a **5-member** frontend team, ensuring a **95%+** on-time feature delivery rate across **4** consecutive agile development sprints.
- Worked closely with business stakeholders to gather requirements and translate them into intuitive UI workflows.
- Improved usability and adoption through iterative UI enhancements based on user feedback.

CRM (Customer Relationship Management System) | 2020 - 2021

Role: Frontend Engineer
Tech Stack: React.js, Redux Toolkit, TypeScript, Axios, REST APIs, Tailwind CSS

- Developed dynamic CRM dashboards to visualize sales performance targets, improving data rendering efficiency for hierarchy-based reports by **25%**.
- Implemented dynamic filtering and reporting based on users, products, and categories.
- Focused on clean UI design, data accuracy, and smooth user interactions for business users.

EDUCATION

Master of Computer Applications (MCA)
Annamalai University, Chidambaram, Tamil Nadu

ADDITIONAL INFORMATION

- **Lead frontend development** and **mentored a 5-member team** in delivering scalable applications
- Experience working in **Product-based environments**
- Open to Remote, Hybrid, and Onsite opportunities; flexible with work-from-office requirements.
